ChatGPT, Gemini va Claude'ni mutaxassis ishlatgandek ishlatish uchun chuqur, ammo oddiy qo'llanma

Prompt yozish, kuchli javob olish, terminlar, shablonlar va AI creator workflow

1

Bittada tushunadigan prompt
formulasi

2

Har bir model uchun alohida
playbook

3

AI creator uchun tayyor
promptlar

Versiya: 18-iyun 2026. Rasmiy hujjatlar asosida yangilangan.

0. Bu qo'llanmani qanday ishlatish kerak

Asosiy fikr

AI'dan kuchli javob olishning siri bitta sehrli so'zda emas. Sir - modelga aniq vazifa, yetarli kontekst, chiqish formati, cheklovlar va sifat mezonini berishda. Professional prompt - bu mini-brief.

- Agar tez natija kerak bo'lsa: 1-bo'limdagi universal formulani ishlatib.
- Agar model tanlash kerak bo'lsa: 3-bo'limdagi jadvalga qarang.
- Agar ChatGPT, Gemini yoki Claude'ni alohida kuchaytirish kerak bo'lsa: 4-6-bo'limlarni o'qing.
- Agar real ishda prompt kerak bo'lsa: 8-bo'limdagi tayyor shablonlardan nusxa oling.
- Agar AI noto'g'ri javob bersa: 10-bo'limdagi xatolar va tuzatishlarni ishlatib.

1. Ochiq fakt: AI kuchli bo'lishi uchun unga brief kerak

- Model odam kabi ichingizdagi niyatni bilmaydi. U siz bergan ma'lumot, cheklov va formatga qarab javob beradi.
- Noaniq prompt noaniq javob beradi. 'Zo'r prompt yoz' o'rniga: '9:16 Instagram Reels cover uchun cinematic, oq yozuvli, 3 ta personajli prompt yoz' deyish kerak.
- Model ba'zan ishonch bilan noto'g'ri gapirishi mumkin. Faktli ishda doim manba, sana, tekshiruv va 'bilmasang, bilmayman de' qoidasini qo'shing.
- Eng kuchli foydalanuvchilar AI'ni bitta savol-javob mashinasi sifatida emas, balki strateg, redaktor, prompt engineer, fact-checker va production assistant sifatida ishlatadi.
- Promptni bitta uzun matn qilish shart emas. Eng yaxshi promptlar bloklarga bo'lingan: rol, maqsad, kontekst, kirish material, chiqish formati, cheklov, sifat mezon.

Professional qoida

Modeldan 'meni tushundingmi?' deb so'ramang. Undan 'vazifani 5 bandda qayta talqin qil, keyin noaniq joy bo'lsa 3 ta savol ber, bo'lmasa natijani chiqar' deb so'rang.

2. Universal formula: R-G-C-I-O-C-Q-R

Blok	Nima yoziladi	Misol
R - Role	AI qanday mutaxassis bo'lib ishlaydi.	Sen senior AI creative director va prompt engineer bo'lib ishlaysan.

- Gemini'ni rasm, video, audio yoki PDF tahlili bilan ishlatganda avval har bir media rolini nomlang: image1 - asosiy personaj, image2 - fon, video1 - harakat manbasi.
- Gemini'dan prompt yozdirayotganda: TEXT ONLY. Do not generate image/video. Output only the prompt. deb boshlang.
